Buildings in the Landscape

Funding and support is available for Penwith farmers to obtain planning and building regulations approval for the conversion of traditional barns for alternative uses.

This project aims to support the restoration, repair or conversion of redundant buildings which have a historical, cultural or landscape value, and to provide a beneficial economic impact for existing farms in Penwith.

Our funding will cover 80% of the cost of obtaining the necessary planning and building regulations, and owners offered support to obtain the permissions. (Building owners must supply 20% match funding). No end use is excluded, but it must respect the historic qualities of the building and local area.

The project is run by a Project Officer, James Evans who will visit potential sites to identify eligibility for funding and to explain the process involved.
